

Capacity building of Uzbek gynecologists on implementation of spinal anesthesia in laparoscopy

Swiss Institute, project leader	Fribourg Cantonal Hospital, (H-FR), prof. Attila Major	Partner Institute, Country, project leader	Tashkent Medical Academy, Urgench branch, Uzbekistan, prof. Kudrat Jumaniyozov
Intended results	The project intends to build clinical capacity of laparoscopy surgeons in the Aral Sea basin of Uzbekistan.		
Target group and beneficiaries	<p>Target groups are young surgeons, doctors, medical researchers working on laparoscopy-related areas.</p> <p>Beneficiaries are researchers, students, doctors and surgeons inhabiting in south-west part of Uzbekistan</p>		
Time frame	June-September 2020	Project cost	CHF 9'875

How will you contribute to health system strengthening?

The expected capacity building activities will help to strengthen professional competence and experience of young surgeons leading to strengthen Uzbek health system.

How will you spread the outcomes of this partnership and influence policy?

- Training materials will be shared to social media
- Joint research paper will be published to influence global academia
- The team will apply to funding programs to continue the collaboration

What are the benefits for all partners involved?

The benefits are:

- increasing Swiss-Uzbek partnership on healthcare systems;
- improving professional skills of Uzbek surgeons via conducting workshops
- exchange of knowledge, clinical skills between Swiss and Uzbek doctors

How do you ensure sustainability of this partnership?

Sustainability of the partnership will be ensured in the following ways:

- After capacity building of Uzbek surgeons, the team expects to widen the networking via applying to research funding programs (i.e., HORIZON2020, SNF) that helps to raise the best methods of surgery to the global audience;
- Preparing and publishing review paper summarizing the perspectives of partnership on laparoscopic surgeries between Swiss-Uzbek organizations;
